说话人 1 00:00
Really, but are during the Future Persona session will, if we have time, we'll try to journey straight and see how you could convert your passive knowledge or implicit insight into explicit beautiful in a description. Yeah, so for the moment, let's keep aside journal. We'll start from Future persona. Yeah, hence are if you are considering or thinking about Future persona as a method between us.

说话人 2 00:33
Cool.

说话人 1 00:34
Yeah, so one of the things I wanted to quickly show you is where future personas safe between the regular 4, what do you call it, full size. I'm going to the full screen later.

说话人 1 00:52
Now, in your methodology, right, in your hierarchy proposals, I think when I read my student's work, I can see certain method flows into input methods goes into interpretation. To be honest, we still haven't really talked about strategy, the type of methods that you can apply to come up with a strategy or a roadmap. So that will be covered in this term. But when I read your proposals, when we read your proposal, you have been putting quite a lot of methods that can be applied to gather data, analyze data relevant to four side section and also more importantly, the input section. And if you look at what you have done in research methodology, this is just for your memory. Yeah, so there are quite a lot of memory that you have been thinking of Islamabad

and all of these methods are categorized under different clusters of four side process. And if you look at the future personas, it is obviously art of.

说话人 1 02:00

Prospection so it is more about future persona is more about giving life to your scenario. So what I'm gonna be talking about today we have an hour and what I'm gonna be talking about I'm gonna talk about what to be done in a very simple way What are the key steps that you need to follow in order to apply future personas to your project There are three four things that you should do and then we'll as a pair we'll try to go through an activity just to figure out some of the content that I describe to you does that make sense.

说话人 1 02:40

Yes, right. So close now that I'm gonna read it through. Yeah, future personnel is not a foresight manner. Don't you agree? Yeah, it's, it's, it's, it's not a like scenario planning method. It's not like, you know, if you are not using, let's say, future personas to plan a scenario, future persona comes after you build up a scenario. That's the first thing you need to remember. Don't try to use future persona as a way of constructing a scenario. First, construct the scenario. So in that case, I understand that you, none of you are ready to apply this knowledge today because we don't have enough. If you are really good or if you are really, you know, planning, then with your project, you might say no delusion. I already have a couple of scenarios, but I think majority of you are still gathering data to constructs enough, right? So future persona trans after you have, you'll see now you already do some exception. And he says a future is a scenario and a future method to let scenario come to life. I already mentioned that. So basically the persona is a correct, is a living agent that is that's gonna be placed in the future situation or a scenario that could build up. And you are using future persona to further communicate what the scenario looks like, how the scenario going to impact your agent, what sort of a day in the life experience that your agent going through in that scenario. That's the whole purpose of doing a future process.

说话人 1 04:35

So yeah, I mean, as future personas are created after the scenario have been built ready, they are an effective way to express take away from each scenario through the descriptions of the persona, psychology, actions and daily life. Therefore, it is fundamental that the key elements of each scenario in a scenario exercise are well known before creating personals, I want to put this. They are purely because, as I highlighted, you need to understand the nitty gritty of your scenario to start the server. I'll talk about what the integrity are in the next couple of slides. Yeah, to construct this session, I am really good deep into literature. I just use couple of references. So if you wanna, let's say, read a bit and if you need to understand how, why, when these could future persona could apply, I highly recommend these two references as I put this in model once we finish the, you know, the session. Yeah, right.

说话人 1 05:41

Step by step guideline. First of all, I'm gonna read this through the screen because there are some important bits I don't want to miss. Yeah, define the core scope of the future as well. That's the first step.

说话人 1 05:51

So if you are thinking about, okay, I now have my scenario already, I need to communicate this scenario to my career. That's where you gonna start various future personas, how you're gonna do in the step 1, define the scope of future persona. Is it design more towards the organizational coherent program? What are the, what are future personas meaning to convey?

说话人 1 06:15

First, you need to understand what the hell are trying to communicate from my person. And but who's going to be my audience? Is it towards to governmental? Is it towards to more, let's say, organizational? So based on your own is based on the audience that you are. are trying to tap into the way you design your persona differs。

说话人 1 06:42

Now, for example, personas that are meant to inform governmental bodies on possible future policy making insight should stress the reactions of a personas to the social, technological and economic micro environment. Popular scenario to shed light on the future load of the government and possibly in gender transfer, emotional policy change.

说话人 1 07:07

So in other words, if your scenario is developed around, I would go into example, let's say you have a scenario and your primary. audience is certain governmental。 Decision makes, right? So if that's the case, so you have a scenario and then in order for you to communicate the nitty gritty of your scenario to your government audience, your persona needs to engage with key elements of that scenario, such as how the persona in, let's say, engage with social aspects, how the persona engage with technological rules and regulation informed by the government.

说话人 1 07:55

So again, just for your understanding, when you, the first step, a. is understand what you wanna communicate or what you' re gonna determine through your。 Product and who's your OD. That's the first thing you need to understand when you approach this.

说话人 1 08:12

Second, creating a scenario faction, I will very briefly go through that because I know you don't have a scenario yet, but when we do the active PD, I just created a simple table. so that we could

you know run through the scenario fact sheet because I'm gonna ask you to create a 10 minute scenario as a pair and then we'll create the fact sheet together. so once, you have a fact sheet then we going. to sinner future personal fashion right. So, this is the step. First, you need to understand what is the purpose of my future persona, what I am trying to communicate, who's going to be my audience. Second, you need to have a fact sheet about your scenario, which you have already built. yeah and the third you need to have your fact sheet for the persona now there are a few things that you need to fill out in a persona fact sheet number one demographic, number two basic facts, number three mindset. Value. Again, we have this activity. You can, you know we could go through that and we will engage with that.

说话人 1 09:22

Okay. Right. Step No. 4, once you have the personalized, now it's about, this is the creativity, right? So once the first three steps come from your research, you understand the scenario, then you understand the audience, and then you pick what the audience gonna look like, and then you decide what the scenario gonna look, sorry, what the persona will look like. Now you need to create a narrative for your persona or it's like a storytelling moment, right?

说话人 1 09:56

In future persona narratives, personas are portrayed in a storytelling fashion. possibly doing something in their future that is highly representative of the scenario, they are meant to represent for example engaging with the product behavior navigating environmental challenges responding to policy rules or responding to AI rules imposed by I don't know governments universities whatever that your scenario ask. You to do? So story, telling me what you are telling a story about the moment of that person's life.

说话人 1 10:31

In this short narrative, pay careful attention to exposing the future personas, mind, nonsense, and value, which is domain No. 3. So I list out what are the mindsets and values that you need to be thinking about. But I wanted to say, when you write a story, make sure it's not just about this, blah, blah, blah. It's nothing to do with that. It's just about the type of values and the mindset that this. persona going through in that moment that's what you are telling or that's what you are describing through your narrative yeah and then finally the most fun bit visualizing it so it's not just about textual description research and I think you all agree that persona needs to be visualized it needs your story needs to be illustrated yeah and for that is where your creative spark comes in you guys are quite good at digital media some of you are illustrators some of you are painters.

说话人 2 11:41

Interesting. That's across absolute.

说话人 1 11:46

I mean, what you have different mediums to tell, you know, to visualize your persona. And my argument is that if you can do a really cool job with this, if you can make a movie, if you can make an animation, if you can make a cartoon, if you can make a really cool, I don't know, like a series of illustrations indicating, telling a story about the day in the life of your persona.

说话人 1 12:15

My argument is that could become a very cool output for a person. It's not just about prospection. It's not just about communicating the, what the, you know, future life. It could also become a very interesting, engaging project out. So think about that. But it doesn't, I mean, some students, like, if I be honest, I haven't seen a cool persona in the last couple of years. They have been using it as a way of communicating, but it hasn't developed to a level 7 standard, co host value standard. But in in emission in future, we have seen glimpses of really cool persona medias. Yeah, so think about that. You know, the final step is one. once you go through this methodological journey five steps sorry four steps the fifth step is to give it a creative flavor or creative life that could come through animation videos music 3D sketches drawings whatever the form that you like OK。 right activity get into pairs and we' ll start the activity OK。 one two。

说话人 2 13:32

Maybe you read what that.

说话人 1 13:38

Now this is just about writing a quick persona fact. She right, right. Just take one and pass it over. So you just need to like work as a pair. So what's your pair? You two working together? Okay, you guys work together. What's your hair? You and coho, can you work together for you?

说话人 1 14:08

So we equally together once your panel, your manner, simply working together.

说话人 2 14:21

Yeah, so key application, right?

说话人 1 14:32

I have few additional, if you are doing individual, if you are very individual, that's perfect, right? The task. Now, as I said, let's go through the step. First, what I did is before we jump into persona, we need a scenario right now. I understand, as I said, I understand that we don't. have scenario yet so what i' m gonna do is。 Is a very simple way of thinking about a signal, right? So you all have signals. yeah series of signals can become a trend yeah, so what i want to do is as a pair of three people or whatever。 Think about the type of signals that you have identified

within your IRP, and pick a one signal that can become. a dominant feature in the next 15 years this is not the way to develop a scenario i have to tell you, but this is a very simple way of like thinking a quick scenario for the purpose of this activity right so the first task 10 minute have a quick check。 Talk about the signals that you have identified for IRP, pick a one signal that can become a dominant in the next 15 years so that you could think about a future scenario based on that, okay. so first task 10 minute go。

说话人 1 16:24

so basically now you guys working together think about you know see。 Signal that you guys like to work with now for the next 10 minutes for, you know, for the one hour. And that signal, think about what happen if that signal becomes the dominant in the world and for example, banning air. So if that happens, how if that becomes the prominent thing in the next 15 years, how our gonna look like.

说话人 1 16:56

So I would like you to first think about the signal, and then I would like to give that word a name. And then I'll go through this just to, you know, just for you to understand, like, for example, three differences in daily life. Think about how people live, work, entertain, relax, or maintain relation in a world in 15 years ahead, how people gonna live there. And then one concern constant, like, okay, there will be changes, but there will be something that doesn't change. For example, peoples who gonna steal exercise.

说话人 1 17:32

Yeah, something like that, right? And then what does this world reward? What does it punish? So what, so in a world like that, what is the beautiful ness of living there? And then what is like? You know, what does it like what does, how does it harm you? So just write down some ideas, thinking about that signal and the and that future signal. Does that make sense? So, but I have question. Yeah, like we're different, like RP. So how to write just agree on one sequence. So I know if you both are, I mean, two different type of IRP project, yeah, have a quick chat about the signals that each of you have identified for your own project and then pick one signal that you both are comfortable. Okay. Yeah, just for the question.

说话人 2 18:22

Good. Okay.

说话人 1 18:44

In that world, particular food and how that person.

说话人 2 18:52

Okay, okay.

说话人 2 19:03

Stress. Yes, I mean, so that could be something, you know, just for an hour think about, you just think about dominant name, the word.

说话人 1 19:47

And then what are countries? Okay, three differences in daily. Think about how people live, work, blah, blah, blah. So that's easier. One could in that world, but what would be a feature that might not change? Might be exercise, might be say, I don't know, right? And then what is the reward of living in that world? What's the benefit? Like, what's the possibility? Yeah, I am very clear.

说话人 1 20:28

People must enjoy the new world.

说话人 2 20:38

I think like, and then there will be something that won't change right now.

说话人 1 20:55

And then, yeah, yeah, yeah.

说话人 2 21:14

It's like always my birthday. Yeah, if you like.

说话人 2 21:54

Trickle shots, sure.

说话人 2 22:12

And they could also work out outside as normal consumption is very good. I think we couldn't get anymore.

说话人 2 24:13

But if we give them a lot of work, I want to invite.

说话人 2 24:34

And for different ways, she could be more online.

说话人 1 24:51

Yes, you have the two minutes.

说话人 2 24:59

So yeah, influencer 5,0%.

说话人 2 25:25

Yes, I just say I don't need the weather.

说话人 2 25:50

So no, yeah, change.

说话人 1 26:02

So you have the features, right? Like future in that world, Omg idea, that means. And then the other video was the most.

说话人 2 26:44

Okay, okay.

说话人 2 27:04

Yes, so everyone think message can be the overall. Yeah, so whether it's very cost, right? Okay, so let's move on to the other base.

说话人 1 28:00

so I think right shall we move the second step so now you have it now this is exactly what you might do for your right so once you have your good data set and probably you could go through 2 by 2 Matrix so whatever the scenario building methods that you wanna apply build up your scenario and if you are ever considering doing a future persona for your scenario first of all. you need to do something similar to this come up with a scenario fact sheet right so now you have a fact sheet for a scenario that you build within you know within 5 minutes time okay the second step remember we were talking about having a persona fact sheet now we need to think about it we have the scenario now we need to build a character who's living in that scenario how to build that we have to have some detailed sheet right next page I'm asking you to think about. Or struggle against it.

说话人 1 29:18

So now think you have a scenario, you have a bit of an understanding about it. Now think about a character who's pride in enjoying or feeding into that scenario or having fun within that scenario, or else struggling is okay. Yeah, a driver embodies the dominant values in the world. A survivor reduces constant physical. So I'll get back to you what that means.

说话人 1 29:44

So in the persona fact sheet, there are three things that you need to fill demographic e cities, right? So you just need to come up with a, you know, a name, location and occupation relevant to your scenario. Are you talking about an aged population? Are you talking about, you know, an adult? Are you mean future of kids? What is the age and what is the Democrat and their basic facts, appearance, two or three words, social work. Who does this person move through their daily? Like, what's their social life gonna look like? What's their social network gonna look like? Couple of words. And then future object, one object, no habit that only exists in this world. Now remember, this scenario is 15 years time. This persona lives there. So you probably think about one habit, object or technology or whatever that is quite unique to this verb and quite closer to this person. Yeah, so these are some of the basic facts that you are building to look at, right? And then the most important thing comes mindset and values. Deepest won't, what are they actively moving towards? What do they want right now? You need to think about, okay, I have this scenario I'm building up for persona. What what should I tell this persona? Or in other words, what should the persona try to express in this scenario? What do they really know in that scenario for this persona, what they are really asking for? Yeah, think about that. What do they not want to think about in that future? In that scenario, you have this character. What do, they don't want to think about what if, what they might avoid in that future?

说话人 1 31:45

Yeah, so I'm just building up a bit more mindset, psychology attributes personality to this person, right? And they co believe, what do they believe the world owes them all around them views towards to organizations means to us to govern these towards to environment. So depending on the scenario that you build up, think about if there is a creature, not a creature, a persona living in that scenario, what might be the mindset towards the environment organization, more than humor, policies, etc. Just add a bit of value to your value system, to your asserver. And then blinds for what? do they refuse to see about their own work they might do something but they might also refuse something what do they refuse to see about their own work yeah so for example they might like to eat KFC but they admire more than human thinking or more you know what I mean so it's like by thinking about this by pointing down these ideas you are building a cat. Enough. But remember, all of this information needs to be done by considering the scenario fact sheets that you build up. Otherwise, it will fall down. Yeah, so share this fan.

说话人 1 33:15

Good 20 minutes thinking about the scenario of achieve and then transferring some of the key terminologies, key ideas, key concepts into the persona hatching. If you can do that, then you have a scenario facchy that could be able to reuse to tell a story about the other side. Does that make sense? Yeah, yeah, you should the future 10 faster. So, okay, so let's spend 20 minutes giving a bit more life to this persona. Because if we can do that now, then the H phase is okay. So narrative, it's just about like an hour explaining how that person ever engage with playing golf

for some a day in the life. That's the narrative. But for us to write the narrative, we need to have effects.

说话人 3 34:23

Sandpaper waiting short time.

说话人 1 34:56

So you welcome you by yourself.

说话人 2 35:08

Are you more stars?

说话人 1 35:10

One scenario, 1,000 numbers. So if you think about this, you are going to like super classes.

说话人 2 35:37

以后我们会散步聊天，讲一讲年轻时候我的倔强和勇敢。

说话人 3 35:52

若相依，尽管便会停下来，回忆着当年。你是有相信我，是有未来。有一天我经过一片花园，可是你不在，现在我看着浪漫电影。可是你不在，我们在忙。我们在忙。我们到底在忙什么？忙着追求，还是忙着不一样的人生？那天我经过一片花园，可是你不在。现在我看着浪漫电影，可是你不在。我们都忙，我们到底在忙什么？忙着追求，还是忙着不一样的人生？

说话人 3 37:11

那天我经过一片花园，可是你不在。现在我看着浪漫电影，可是你不在。

说话人 1 37:28

我们都忙。

说话人 3 37:30

我们到底在忙什么？忙着追求，还是忙着不一样的人生？吼。那天我经过一片花园，可是你不在。现在我看着浪漫电影，可是你不在，我们在忙，我们都忙。我们到底在忙什么？忙着追求，还是忙着不一样的人生？吼。

说话人 3 38:20

像年轻时候我的倔强和你。然后相拥情况便会停下来，回忆着当年你是忧伤少年，我只喜欢你。他。

说话人 3 39:23

以后我们会散步聊天，讲一讲年轻时候我的倔强和你的。然后像游鱼经过那片海，停下来，回忆着当年你是优生少年，我是阳光女孩。那天我经过一片花园，可是你不在，现在我看着浪漫电影，可是你。我们在忙，我们都忙，我们到底在忙什么？忙着追求，还是忙着不一样的人生？

说话人 3 40:29

不在。现在我看着浪漫电影，可是你。不在，我们在忙，我们都忙。我们到底在忙什么？忙着追求，还是忙着不一样的人生？

说话人 3 40:58

那天我经过一片花园，可是你不在。现在我看着浪漫电影，可是你不在，我们在忙。我们都忙，我们到底在忙什么？忙着追求，还是忙着不一样的人生？吼。以后我们会散步聊天，讲一讲年轻时候我的倔强和你的晚安，然后相拥，尽管那天我已停下来。我只是。

说话人 1 42:02

我只是。

说话人 1 42:27

and for the social work with the one platform social work and people from each other.

说话人 3 42:40

以后我们会散不了。那天讲一讲年轻时候我的倔强和你的不安，然后相拥经过那片花园，停下来，回忆着当年你是忧伤少年，我是阳光女孩。那天我经过一片花园，可是你不在，现在我看着浪漫电影，可是你。不在，我们在忙，我们都忙。我们到底在忙什么？忙着追求，还是忙着不一样的人生？那天我经过一片花园，可是你不在，现在我看着浪漫电影，可是你。不在，我们在忙，我们都忙。我们到底在忙什么？忙着追求，还是忙着不一样的人生？

说话人 3 44:14

那天我经过一片花园，可是你不在，现在我看着浪漫电影，可是你。我们在忙，我们都忙，我们到底在忙什么？忙着追求，还是忙着不一样的人生？那天我经过一片花园，可是你不在。现在我看着浪漫电影，我开始。我们都忙，我们到底在忙什么？忙着追求，还是忙着不一样的人生？

说话人 1 45:10

我们都忙，我们到底在忙什么？忙着追求，还是忙着不一样的人生？

说话人 1 45:34

so the last step of a good persona is this storytelling. want to know the character want to understand who this person is what are their abilities what are. fears are then you could think about a moment in that picture and write a story about how that person is going to engage with that moment why you are writing it because that's a highlighted invite you are writing that for your audience to understand what moment look like because if you are writing this for a

government audience if your target audience is policy they need to understand what is your scenario how does it how that scenario is going to affect the video viewer。 who' s at 23 years old。 yeah, so once you write that story then as I highlighted in my presentation, think about show life, think about animation, think about editing, think about the video。 yeah if you can create one solid。 yeah if you can create one solid。

说话人 3 46:47

you know that element for your。 right, so last week, I was my employees are going to follow journey and I mention to you about 10% people now journeying this is just for you to read。

说话人 1 47:13

remind, I' m just reminding journalism about this journey it' s a method that you can document your thinking process and progression and provide evidence written format now if you can apply some of these prompts to the activity。 That you have just finished, for example, step 1, what have you been doing? What are the steps that you have gone through? So that information is already here in this manner. So all you have to do is, if you want to put this into a research journal, put some plastic notes, thinking about what did you do here? What are the positive, what are the negatives due to the, did you learn anything today? Yeah, and then put another post in our saying, sorry, put another question on saying what, how you gonna apply this to your project? Like, will you be doing animation as part of visualizing the persona? Will you be writing a series of stories for each scenario? Sorry? Will you be writing a series of stories for each persona that you develop for each scenario. So maybe just after this session, if you want to keep this copy or if you want to entry into your journal, just post it now to reflect by considering some of the prompts that I have given.

说话人 1 48:48

Yeah, now this apply to any other research task that you do throughout this unit. This applies to any other material experimentation that you do throughout this journey. If you can just make this as a practice, you have a leading theory of practice read documented in a journal. Yeah, so that' s what I want to communicate. I hope it makes sense.

说话人 1 49:13

But when you are having a scenarios at hand and when you are about to build up personas, give me a shout. Maybe I could do a Q&A session to give you a bit more support to resolve the persona content. Thank you. Any questions?

说话人 2 49:40

Okay. I have to know manner of left.

说话人 1 49:44

So if you want this way, and I will copy into. Yeah, and I'm really looking for the digital media that people use to give life animation.

说话人 2 50:53

One minute.

说话人 1 51:07

God.

说话人 2 51:33

没水。

说话人 1 51:35

每个组总要有一个水。

说话人 2 51:38

我们组还是有水。跟我一起。没了。

说话人 1 51:46

鞋粉。对啊。鞋粉跑路了。

说话人 2 51:51

他等下再拿。你不要这个。这个。你不要这个。

说话人 2 52:01

今年一年光买手机去了。是。搞个苹果代理商吧。

说话人 1 52:32

Unless you can do a property of 9,3, it's a surprise which one you. I already know. Like, no, and it's not like that. It's like, it's a typical breed is that which you gonna like, but you don't you gonna not hear the name. We are discussing it, but you gonna see the review output instantly here. So, no, I have a question. Yeah, I guess you are not sure, but we don't.
