Visual culture for marginalised groups	14:00–14:15	**Weijie Li (Oliver)**	Why eating well feels like nothing: redesigning dietary feedback loops	14:00–14:15	**Binger Lyu (Icy)**	Optimised life perfectly empty: agency in algorithm-optimised society	14:00–14:15	**Sol Rocholl**	AI and the future of human (critical) thinking: Epistemic autonomy
			14:15–14:30	**Qiaoying Jin (Blair)**	AI reshaping digital social infrastructure via content-driven feeds	14:15–14:30	**Jingyun SHEN (Yun)**	Continuity in existence: designing for digital legacy	14:15–14:30	**Yihe Gao**	Memory of the Human Experience on Earth	14:15–14:30	**Chengming Zhang**	KPIs and AI tools in Chinese short-videos MCN
BREAK 14:30 – 14:45														
			14:45–15:00	**Haoyue Yang (Coco)**	Flora-human relationships: urban living with nature	14:45–15:00	**Hongyu Cai (Archy)**	Fairness in future shop floor: exoskeleton systems	14:45–15:00	**Haochun Wang (Jeremy)**	Human Hair as a Resource	14:45–15:00	**Wenwen Ji**	Women rights in China: hidden drivers of choice
			15:00–15:15	**Yuxuan Xu (Lin)**	Plastic human bodies: adapting to socio-environmental change	15:00–15:15	**YUWEI TANG (Lili)**	Urban Drone Delivery Navigation System	15:00–15:15	**JINGYI CHEN**	Digital Isolation for Elderly Londoners	15:00–15:15	**Yinuo Yu**	Extreme outdoor working: humans' ability to adapt
												15:15–15:30	**Xingyu Xie**	More-than-human perspective on human-object relationship

SESSION FORMAT

Total slot: 15 minutes per student
Presentation: 5 minutes. Student presents using slides, referring to physical evidence on the tabletop
Discussion: 10 minutes. Staff ask questions and complete an assessment rubric.

Slides should contain minimal text and are used as prompts only, not scripts, students are expected to talk around each slide rather than read from it. For Slide 3, there is no slide content required; students present directly from the evidence on the tabletop

What needs to be on the tabletop? Students are required to display the following items on the tabletop:

1. A 3D object: a metaphor for the research project: Students may bring the same object they used at the IRP Proposal Crit, or an improved version. This is not a model or prototype. It is a thinking tool, a way into the research for an unfamiliar audience, used directly in Slide 1.

2. Visual evidence of primary research conducted to date: Tutors want to see what students have actually done, who they spoke to, what they observed, and what they found. This evidence is referred to directly during Slide 3 and should be visible and accessible throughout the discuss

Peer evaluation: During the crit session, students will be paired up to conduct a peer evaluation. The details will be shared via Moodle
